

CLAIM AMENDMENTS

1. (Canceled)

2. (Currently amended) ~~The A device as described in Claim 1,~~ for air supply of a fuel cell comprising:

an expander,

a compressor that is at least partially driven thereby,

a burner producing hot gases of combustion that at least occasionally flow through the expander, and

a heat exchanger disposed between the expander and the burner that transfers at least a portion of thermal residual energy remaining in the hot gases, after flowing through the expander, to at least one of the fuel flows supplied for combustion,

wherein the heat exchanger receives exhaust gases after the expander as well as air that flows through the heat exchanger for combustion.

3-14. (Canceled)

15. (Currently amended) ~~The A mobile fuel cell system as described in Claim 14,~~ having a device for air supply of a fuel cell comprising:

an expander,

a compressor that is at least partially driven thereby,

a burner producing hot gases of combustion that at least occasionally flow through the expander, and

a heat exchanger disposed between the expander and the burner that transfers at least a portion of thermal residual energy remaining in the hot gases, after flowing through the expander, to at least one of the fuel flows supplied for combustion,

wherein the heat exchanger receives exhaust gases after the expander as well as air that flows through the heat exchanger for combustion.

16-25. (Canceled)
